

Senators:

ACA urges you to stand with Canadian producers and pass Bill C-234 into law.

As you return to the halls of the Senate, Canadian producers take to their fields, gearing up for harvest and the approaching winter. Grain dries, while barns and greenhouses warm.

This crucial work demands working capital.

With no viable fuel alternative, carbon surcharges on vital farm practices hinder investment in innovation, best management practices and competitiveness.

By exempting carbon surcharges for necessary agricultural activities that lack alternatives, Bill C-234 puts working capital back in producers' hands and empowers them to enhance sustainability while growing productivity.

Let's unleash producers' full potential. Support Bill C-234 today.
